## Carburetor Shipping Preparation Checklist

Print this checklist out, use to pack your carburetors, and include inside box - Thank you!

1		Cyl compression readings (Perform cold and dry)  1  2		4	5	6	
2		Elevation where readings takenFT ls this	where you norm	nally ride?	Yes	☐ No	
3		Has the engine recently been rebuilt (including machining)?					
4		Is the end-user of these carbs a third party? That is, are you a repair shop?					
5		So I can better serve you, what are the performance issues, if any, you hope to solve by this carb rebuild?					
6		Stock air filter?					
7		Stock exh? Aftermkt w/ 1 1/2" baffle or less?	Over 1 1/2"?	Supert	rapp w/more t	than 8 disks?	
8		If float bowls were removed, please reinstall to protect the carburetor's most delicate areas for shipping.					
9		Remember to tighten the choke cable clamp to avoid its falling off carburetors inside shipping box.					
10		Please include all the parts that belong on the carburetors. This includes the throttle cable bracket, the idle speed screw, vent hoses, vacuum hoses, and vacuum valve, if kind that is attached to the carburetors.					
11	Loosen all float bowl drain screws and allow the carbs to drain and then "air" for at least 30 minutes.						
12		Please avoid using "peanuts" for packing. Carburetors do better with bubble wrap and stiff paper.  And please don't use styrofoam in any form. Not peanuts, sheet or block. Thank you.					
13 Make sure your PayPal account is up to date with your current, complete shipping address.
