SPECIAL TOOL CATALOG

INTRODUCTION

This special tool catalog provides service technicians with a list of Suzuki Motor Corporation tools available through Suzuki Motor of America, Inc. (SMAI). It covers motorcycles, scooters and ATVs distributed by SMAI from 2008 through 2013. These special service tools are designed for specific applications of disassembly, measurement and reassembly. Using these tools greatly reduces the amount of time involved with these applications as well as the possibility of damaging components.

This catalog is laid out into four primary sections:

- The first section is a tool index listing all special tools grouped into one of several categories and then arranged by part number with a tool description.
- In the second section, each special tool is listed by category in numerical order with a picture and description of the tool.
- The third section describes the Neway Valve Seat Cutter Tool Set and how to order it directly from Neway Manufacturing.
- Finally, the last section of this catalog lists all the models sold by SMAI between 2008 and 2013 and provides a listing of the applicable special tools required for those vehicles.

NOTE:

Some tools may no longer be available from SMAI. Many of these tools can be obtained from third-party tool suppliers such as Motion Pro, K & L Supply Co., Snap-On Tools, Sears, or your local machine shop supply company.
